

# PIR TLDs

Middle East DNS Forum  
Cairo, Egypt  
May 22, 2017

**Allan Ghazi**  
Advisory Council Member | Public Interest Registry (PIR)

.org

## Get to Know Us

- Based in Reston, Virginia, Public Interest Registry is a not-for profit organization created by the [Internet Society](#).
- In January 2003, Public Interest Registry became officially responsible for operating .org and maintaining the authoritative database of all .org domain names. The transition of .org from the previous operator to Public Interest Registry was the largest transfer in Internet history. More than 2.6 million domains were transferred in about a day, without affecting any .org registrant or website.

## Origin

Created in 1984, .org is one of the internet's original Top Level Domains (TLDs), along with .com, .net, .gov, .edu and .mil. Although it is "open" and "unrestricted", .org has assumed the reputation as the domain of choice for organisations dedicated to serving the public interest. Today, it remains the domain of trust

.com

.net

.org

.gov

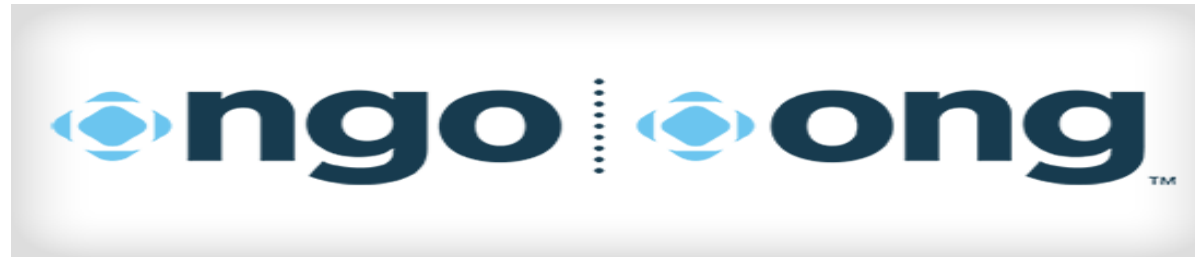

.edu

.mil

# Products

- » The .org Domain
- » The .ngo and .ong Domains
- » International Domains

## The .ngo and .ong Domains

- » These two new exciting domains, [.ngo](#) & [.ong](#), are exclusively for validated Non-Governmental Organisations (NGOs) with [.ong](#) being the Romance language version of [.ngo](#).

## whats OnGood ?

- » OnGood is an exclusive suite of online services revolutionising the way NGOs and nonprofits worldwide raise awareness, funds and support for their missions:
- » A community website with a searchable directory to improve visibility and connect with sponsors and other NGOs.
- » A customisable online profile within the OnGood community where NGOs showcase campaigns, share activities and information, and collect donations.
- » OnGood's validation process helps to ensure that websites with .ngo and .ong identities represent genuine NGOs.

## International Domains

- » We believe that these new online destinations open the Internet to billions of people in their own languages. We welcome the opportunity to connect with those who are willing to share their fresh ideas and perspectives in this expanding new arena.
- » Equivalents to .org are available in the following languages:

- » [Russian \(Cyrillic\)](#)
- » [Hindi \(Devanagari\)](#)
- » [Simplified Chinese](#)
